

analysis report – 407-0977595 תשריט

התחדשות עירונית במתחם הטייסים, נס ציונה

data/projects/407-0977595/source-documents/tashrit
4a09c381ee2ee8ca861b448a84
andas / shapely / pyproj / rasterio)

Per-parcel geometry consistency .1

the Israeli ITM range – assumed EPSG:2039 for area calculations.

Roster cross-check

	members
	1, 2, 4, 5, 6, 10
	1, 2, 4, 6
	1, 2, 4, 6
	3, 5

Per-parcel area

plot_area_sqm	Δ% vs schema	verdict
	-0.01%	✓ area match
	-0.09%	✓ area match
d)	–	⚠ no plot_area_sqm in schema
d)	–	⚠ schema says scope_out – but parcel IS in this תשריט
	+0.10%	✓ area match
d)	–	⚠ undeclared in schema

is not declared. Computed area = 2,830.97 m².

-
- Reason 'Plots 3 and 5 are in northern site covered by plan 407-1109909 which is NOT
- . The scope_out premise is contradicted by the data.
-
- in schema parcels[] and NOT in meta.scope_out . Undocumented.
-
- but ABSENT from migrashim.shp . The shapefile has no parcel with this ID.
-
- Id is present but unpopulated by MAVAT for this plan. Cross-check (a)
-

puted-vs-schema.

cel roster has gaps and/or a scope_out contradiction (see findings).

Topological coverage .2

ham → 16,580.00 m² - meta.total_site_area_sqm : 19516 m²

cel union area: 16,578.04 m² Gaps within envelope: 2.25 m² Pairwise parcel overlaps: 0.00

TM (180744.0, 649108.4) - gap #2: area 0.62 m², centroid ITM (180767.3, 649111.8) - gap
area 0.00 m², centroid ITM (180841.6, 649133.7) - gap #5: area 0.00 m², centroid ITM

- 1000 = 16,580.00 m², but `total_site_area_sqm` = 19516 m² (Δ 2,936.00 m²). Pick
- שטח / unassigned strip — if expected, document; if not, the parcel boundaries don't tile
- only roads / open space).

Land-use designation cross-check .3

ns, with attributes `Id`, `ISHUV`, `TOCHNIT`, `NUM`, `KOD`, `NAME`. `KOD` values seen in this
s for annotation/symbol categories, not land-use YEUD codes. The expected sub-יעוד

0 (one code per parcel), not in `ymishnep.shp`. Reading from there:

	schema land_use	verdict
מגורים ד'	מגורים ד'	✓ match
שביל	<i>not declared</i>	<i>(no schema land_use)</i>
מגורים ד'	מגורים ד'	✓ match
	שצ"פ	lookup missing
	<i>not declared</i>	<i>(plot not in schema)</i>
	מבנים ומוסדות ציבור	lookup missing

29 ×36, 31 ×26.

- able): 676, 882. Confirm against MAVAT YEUD reference and extend `YEUD_LOOKUP`.
- plan — it carries 62 annotation points with KOD `'29'` / `'31'`. Land-use polygons are
- no separate sub-יעוד polygon layer in this תשריט.
- but unknown YEUD codes need confirmation.

kavim kchulim.shp identity .4

the Israeli ITM range — assumed `EPSG:2039` for area calculations.

7.90 m (perimeter if polygon) **Total area:** 16,580.20 m²

	values (first row)
	np.int64(7200)
	'407-0977595'
	np.int64(6)
	np.int64(16)

ulim = 16,577.95 m² (100.0% of kavim kchulim)

ns the parcel union (≥80% coverage), with the same `TOCHNIT` ID (`407-0977595`) as the
(קו בניין). Building setback lines live one level below — they're the offset edges

- defined by the single-polygon geometry containing all parcel polygons.
- plan boundary.

Raster georeferencing consistency .5

	bbox min ITM	bbox max ITM	real size (m)
2	(180683.1, 648994.2)	(180908.3, 649207.3)	225.2 × 213.1 m
2	(180683.2, 648994.2)	(180908.4, 649207.3)	225.3 × 213.1 m
4	(180679.8, 648993.4)	(180976.9, 649203.3)	297.1 × 210.0 m

- tolerance ±5 m)
- as expected (_M coarse, _58 fine).

Summary findings (ranked by severity)

- schema `parcels[]` but `plot_area_sqm` is not declared. Computed area =
- tests `plot_5` in `meta.scope_out` with reason 'Plots 3 and 5 are in northern site parcel (402.77 m²) IS within this plan's תשריט. The scope_out premise is contradicted
- in shapefile (207.38 m²) but NOT declared in schema `parcels[]` and NOT in
- n schema (`parcels[]/scope_in/scope_out`) but ABSENT from `migrashim.shp`. The
- ues in `migrashim.dbf` are `0.0` — the field is present but unpopulated by MAVAT for
- ilable; we rely on (b) computed-vs-schema.
- t: `total_site_area_dunam` × 1000 = 16,580.00 m², but `total_site_area_sqm` =
- an envelope. Likely roads / שטח"פ / unassigned strip — if expected, document; if not,
- les in `migrashim.shp` (not in our lookup table): 676, 882. Confirm against MAVAT
- es NOT contain land-use polygons for this plan — it carries 62 annotation points with
- `shim.shp.YEUD` (one code per parcel), with no separate sub-יעוד polygon layer in this
- plan boundary (קו נחול), confirmed by the single-polygon geometry containing all

Action items

- `30.97` to `parcels[plot_4]` in the schema.
- ut for `plot_5` — either remove from `scope_out` (if it's actually inside 407-0977595)
- ction.
- belongs in `parcels[]` (with full definition), `meta.scope_out` (excluded), or
- om the schema (if it doesn't exist in this plan) or investigate why the תשריט lacks it.
- unam and `meta.total_site_area_sqm` — recompute the canonical value from the

- `src/tashrit_analysis.py` with the unknown codes (checked against the MAVAT
- `t.todo_building_line_layer` in the schema to record this conclusion: kavim
- layer remains unidentified — DWG layer extraction (`407-0977595_בצמטעצות.dwg`) is still

e before changing anything.
